

SHUBHAM SHINDE

Senior Frontend Engineer | React.js | Next.js | TypeScript | Redux | GraphQL | AWS | Docker | Kubernetes | Micro-Frontend Architecture

Pune, India | +91 8605827449 | shindeshubham2442@gmail.com | [Visit LinkedIn](#) | [Visit GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Engineer with 4+ years of experience building scalable, enterprise-grade web applications across Banking, AI, Cloud, HRMS, Infrastructure, and E-commerce domains. Specialized in React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, GraphQL, and micro-frontend architecture for developing high-performance, reusable, and scalable frontend systems. Experienced in cloud-native frontend engineering using AWS, Docker, Kubernetes, Terraform, Jenkins, and CI/CD automation pipelines. Strong expertise in frontend performance optimization, reusable component architecture, responsive UI engineering, WCAG accessibility, and API-driven application development. Proven ability to collaborate with cross-functional teams, contribute to frontend modernization initiatives, and deliver scalable product engineering solutions in Agile environments. Passionate about building scalable frontend systems and delivering high-quality digital experiences for enterprise applications.

CORE TECHNICAL SKILLS

- **Frontend Technologies:** React.js, Next.js, JavaScript (ES6+), TypeScript, Redux, Redux Toolkit, Redux-Saga, React Hooks, Context API, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Material UI
- **Architecture & UI Engineering:** Micro-frontend Architecture, Component-Driven Development, Design Systems, Atomic Design, Responsive Web Design, Reusable Component Libraries, Frontend Modernization
- **Performance Optimization:** Code Splitting, Lazy Loading, Dynamic Imports, Memoization, Lighthouse Optimization, Core Web Vitals, Rendering Optimization
- **API & Integration:** GraphQL, REST APIs, OpenAI API, Drupal CMS API, State Management, API Optimization, WebSockets
- **Cloud & DevOps:** AWS, Azure, Docker, Kubernetes, Terraform, Jenkins, CI/CD Pipelines, GitHub Actions
- **Testing & Quality:** Jest, React Testing Library, Enzyme, Unit Testing, Integration Testing, Debugging, Code Review, WCAG Accessibility
- **Tools & Platforms:** Git, GitHub, Jira, Rally, Postman, Agile/Scrum, Node.js, MongoDB

KEY ACHIEVEMENTS

- Delivered 6+ enterprise-grade applications across Banking, AI, Cloud, HRMS, Infrastructure, and E-commerce domains using React.js, Next.js, and TypeScript.
- Improved frontend performance by up to 35% through code splitting, lazy loading, optimized rendering, and reusable component architecture.
- Achieved 95%+ unit and integration test coverage using Jest and React Testing Library, significantly reducing production defects.
- Reduced deployment time from hours to minutes by implementing Docker, Kubernetes, Jenkins, Terraform, and automated CI/CD workflows.
- Implemented scalable micro-frontend architecture for enterprise banking applications, enabling modular development and independent deployments.
- Integrated OpenAI GPT APIs and Drupal CMS APIs to build AI-driven conversational interfaces and dynamic content management systems.
- Contributed to frontend architecture discussions, sprint planning, stakeholder demos, and cross-functional delivery coordination.

PROFESSIONAL EXPERIENCE

Ageit Endorse Pvt. Ltd., Pune | Sr. Software Engineer | July 2022 – till now

- Designed and developed enterprise-scale frontend applications across Banking, Cloud, HRMS, and Infrastructure domains using React.js, Next.js, TypeScript, Redux, Redux-Saga, GraphQL, and REST APIs.
- Led frontend implementation efforts for modular micro-frontend banking platforms, enabling scalable feature delivery and maintainable UI architecture.
- Configured and optimized CI/CD pipelines using Docker, Kubernetes, Jenkins, AWS, and Terraform for secure and automated deployments.
- Developed WCAG-compliant, responsive banking portals and HRMS applications with reusable component libraries and scalable frontend architecture.
- Managed complex asynchronous workflows using Redux-Saga and optimized frontend performance using lazy loading, memoization, and reusable state management strategies.
- Collaborated with Product Owners, QA teams, backend engineers, and DevOps teams during sprint planning, backlog refinement, architecture discussions, and stakeholder demos.

Project: Health Care Advisory Platform (Healthcare Domain)

July 2025 - till now

Description: The Healthcare Advisory project aims to enhance operational efficiency and patient care for U.S. health plans by streamlining the prior authorization process. It supports insurance providers in determining the medical necessity of treatments, procedures, or services, ensuring they align with patients’ health coverage. The system enables healthcare providers to submit and manage prior authorization requests efficiently, improving decision-making and service delivery.

- ✓ Directed a team of frontend developers and built a modular architecture using React.js and Next.js.
- ✓ Designed fully responsive and accessible UI components adhering to WCAG standards.
- ✓ Employed Redux-Saga for robust state and async management.
- ✓ Configured CI/CD pipelines via Jenkins and integrated AWS services for scalable deployment.
- ✓ Played a vital role in sprint planning, backlog grooming, and stakeholder demos.

Tech Stack: React.js, JavaScript, Next.js, TypeScript, Redux-Saga, Micro frontend, AWS, Jenkins, Docker, Kubernetes, Terraform, Rally, REST APIs, GraphQL

Project: AgeSync-360 – HRMS Platform (HRMS Domain)

Dec 2023 - June 2025

Description: A dynamic e-commerce portal built to deliver personalized shopping experiences, real-time cart operations, and seamless order fulfillment.

- ✓ Developed UI components from scratch using Tailwind CSS, Bootstrap, and Material UI.
- ✓ Managed state with Redux and handled user interactions with optimized asynchronous calls.
- ✓ Implemented modular architecture and followed design principles for better scalability.
- ✓ Wrote unit and integration tests to ensure high-quality code delivery.

Tech Stack: React.js, Redux, JavaScript, TypeScript, Tailwind CSS, Bootstrap, Postman, Docker, Kubernetes

Project: NR Track Category Generation System (Infrastructure / Railway Domain)

July 2022 - Dec 2023

Description: A rail infrastructure classification platform for Network Rail UK, improving asset management, compliance, and digital reporting.

- ✓ Created interactive data dashboards and forms with real-time updates.
- ✓ Integrated backend systems using secure and scalable RESTful APIs.
- ✓ Conducted unit and integration testing, achieving over 95% test coverage.
- ✓ Worked closely with product and QA teams to validate requirements and deliver high-quality releases.

Tech Stack: React.js, Redux, JavaScript, TypeScript, Node.js, MongoDB, Jest, JIRA

PROFESSIONAL CERTIFICATIONS

- Generative AI for Software Development — Coursera
- Generative AI: Prompt Engineering Basics — Coursera
- Docker & Kubernetes for Cloud-Native Deployments — Udemy
- Microsoft Azure Certification — Udemy
- Agile Fundamentals — Coursera
- Python with Data Science & Machine Learning — Simplilearn

Leadership & Collaboration

- Collaborated with cross-functional teams across Product, QA, Backend, and DevOps environments.
- Participated in architecture discussions, sprint planning, backlog refinement, and stakeholder demos.
- Conducted peer code reviews and contributed to frontend modernization initiatives.
- Supported Agile delivery and enterprise-scale frontend implementation efforts.

EDUCATION

B.E. in Electrical Engineering — Shivaji University Kolhapur | 2016 – 2020 | 83.31%
Diploma in Electrical Engineering — MSBTE | 2012 – 2016 | 70.13%
SSC — Vidyapeeth Highschool Kolhapur | 2013 | 65.60%
